SUMMARY

Aspiring full-stack developer and 2nd-year B.Tech CSE student at UVCE, committed to strengthening problem-solving abilities

EDUCATION

2024 – Present	Bachelor's Degree at **UVCE**	(9.5 CGPA)
2024	Class 12 (PUC)	(95%)
2022	Class 10 (ICSE)	(94%)

PROJECTS

PDF Utility Tool [Source Code]

A multi-tool desktop application for PDF merging, splitting, rotation, and image-to-PDF conversion.

- Developed a modular interface enabling seamless switching between PDF tools within a single window.
- Built a consistent and clean UI using Tkinter for improved usability.
- Organized the project into separate Python modules for maintainability and clarity.

Blog Post Website [Source Code]

A full-featured web app for creating, editing, and managing blog posts with a modern and responsive interface.

- Implemented complete CRUD functionality for blog posts.
- Used MongoDB for backend data storage and LocalStorage for retaining client-side state.
- Built a responsive front-end using React with clean component architecture.
- Integrated secure user authentication and authorization using JWT.

SKILLS

Languages:	Java, Python, HTML, CSS, JavaScript
Frameworks:	React, Tkinter
Databases:	MongoDB
Developer Tools:	Git, VS Code, Postman

CERTIFICATIONS

- The Complete 2024 Web Development Bootcamp — Udemy

ACHIEVEMENTS

- Proactively learning modern technologies such as React, MongoDB, and Node.js to expand development expertise.
- Maintaining a consistent project portfolio featuring real-world applications.
